

March 31, 2008

The Honorable Nancy Pelosi  
Speaker  
U.S. House of Representatives  
Washington, D.C. 20515

The Honorable John Boehner  
Republican Leader  
U.S. House of Representatives  
Washington, D.C. 20515

The Honorable John M. Spratt  
Chairman, Committee on the Budget  
U.S. House of Representatives  
Washington, D.C. 20515

The Honorable Paul Ryan  
Committee on the Budget  
U.S. House of Representatives  
Washington, D.C. 20515

Dear Representatives:

One Voice Against Cancer (OVAC), a collaboration of organizations representing millions of Americans affected by cancer, strongly supports the \$3 billion increase in funding for the National Institutes of Health (NIH) recommended by the Senate-passed FY09 Congressional Budget Resolution. Following five years of flat funding for medical research and cancer control, the Senate-proposed increase is critical to continuing our progress in the fight against cancer. Accordingly, we urge you to support the Senate position during the budget conference deliberations.

Prior investments in cancer research, education, prevention, awareness, treatment, and control at NIH have brought real progress in the fight against cancer. While cancer rates have been dropping for more than a decade, flat funding for cancer research and control in recent years is jeopardizing the progress we have made.

For many of the deadliest cancers, thirty years of progress has been incremental at best. Lung and pancreatic cancer, the first and fourth leading causes of cancer related deaths, are two examples of cancers for which survival rates have not substantially improved. In 1975, the five year survival rates for lung and pancreatic cancer were 13 percent and 2 percent respectively. Over 30 years later, survival rates have barely improved to 16 percent and 5 percent.

Cancer continues to strike one out of every two men and one out of every three women. This year alone, cancer will claim the lives of more than 559,000 Americans, and will cost our nation \$206 billion in lost productivity, human capital, and increased direct medical costs.

While we are mindful of the fiscal challenges faced by the nation, the time has come to renew the federal commitment to fighting this disease. Accordingly, we urge the House to accept the challenge and adopt the Senate-passed funding level as part of the final FY09 Congressional Budget Resolution.

Please help us continue the progress we have made in fighting this disease. If OVAC can be of any assistance to you in this matter, please do not hesitate to contact Daniel E. Smith of the American Cancer Society Cancer Action Network and Chair of the OVAC coalition at (202) 661-5701. Thank you for your support.

Sincerely,
